Dear Burn V6 Users -

For many years, ABA has invoiced for DI's data collection software for users of Burn V6 (which is owned and provided by DI) along with invoicing for participation in the ABA's NBR. Starting with 2019, these costs will be split out. You will receive an invoice for your software subscription from DI in January for the January 1, 2019 through December 31, 2019 period; and an invoice from ABA next Fall for the July 1, 2018 through June 30, 2019 Call For Data. ABA has paid for your software licenses with DI through December 31, 2018, after which you will need to continue your license arrangement on your own.

Both DI and ABA wish to make this transition as seamless as possible. DI will extend terms for any centers that need to defer payments to later in the year for budgeting purposes given their commitment to this plan. For 2019, your DI software invoice will be at a grandfathered rate of \$1875 and your ABA NBR participation fee will \$1500.

Both ABA and DI will be announcing exciting innovations in the coming months. DI will be providing a free data submission portal for users of its software as well as all CDM and Lancet burn software module users, that will include enhanced data validation dashboards to help enhance overall data quality.

Thank you for your continued participation in the NBR and support of ABA's mission. If you have questions about the ABA's NBR or 2018, please contact Maureen Kiley [kiley@ameriburn.org](mailto:kiley@ameriburn.org) for questions about Burn V6 software, contact Julie Violante [jviolante@dicorp.com](mailto:jviolante@dicorp.com) or Tim Favazza [TFavazza@dicorp.com](mailto:TFavazza@dicorp.com). As always technical support questions for Burn V6 should continue at [support@dicorp.com](mailto:support@dicorp.com).

Sincerely,

A handwritten signature in black ink that reads 'Kimberly A. Hoarle'.
